EXPERIENCE

CODITAS | SOFTWARE ENGINEER

Sept 2021 - Present | Pune, MH

- Working as a **full-stack developer** in ASP.NET MVC, .NET Core, Angular.
- Stabilized applications** during time critical requirements.
- Worked on ASP.NET MVC, SQL, HTML, CSS, JS, JQUERY, .NET Core MVC, Angular.
- Have **exposure to** Redis, RabbitMQ, SignalR.

Project: ConnectAndSell

- This is a **calling based web application** used by big tech companies for calling business leads which are actually decision makers.
- It has **helped its customers to multiply their sales by 10x** providing features like Lightning mode with agents, AMD, computer audio, call recordings, reports to track performance & business, Support for more than 5 CRM's.

Contribution:

- Collaborated with clients and designers** to gather requirements and ensure project alignment.
- Delivered **high-quality backend code and front-end improvements**, owning tasks from development to deployment.
- Led** and Developed a system for detecting automatic dialing prefixes, time-zones, to match the call timing the best suitable to the leads geography which improved the **lead connect ratio by 35%**.
- Provided **live support** and managed weekly tasks efficiency.

OTHER PROJECTS

QA Dashboard

Front-End Developer | 6 Months Duration

- A **fully automated web application** which provides **Realtime statistics, analysis & reports** for all the QA testing for passed & failed builds.
- It helps to **get rid of most of the manual work & tracking** done by testers by saving a lot of time. Provides every detail from build number to test case failed.
- Worked on technologies - Angular, TypeScript, MongoDB.
